Random Order Sets

The following pages have the 54 animals that appear in the BINGO cards in different random orders. This way, you can play a BINGO game by reading the animals out loud, moving down the set, instead of drawing slips from a bowl. Since there are 60 different sets, you can play the game 60 times with a unique game each time (which is probably more than you'll need, but better to be prepared, right?).
